

# SafeDX data centre

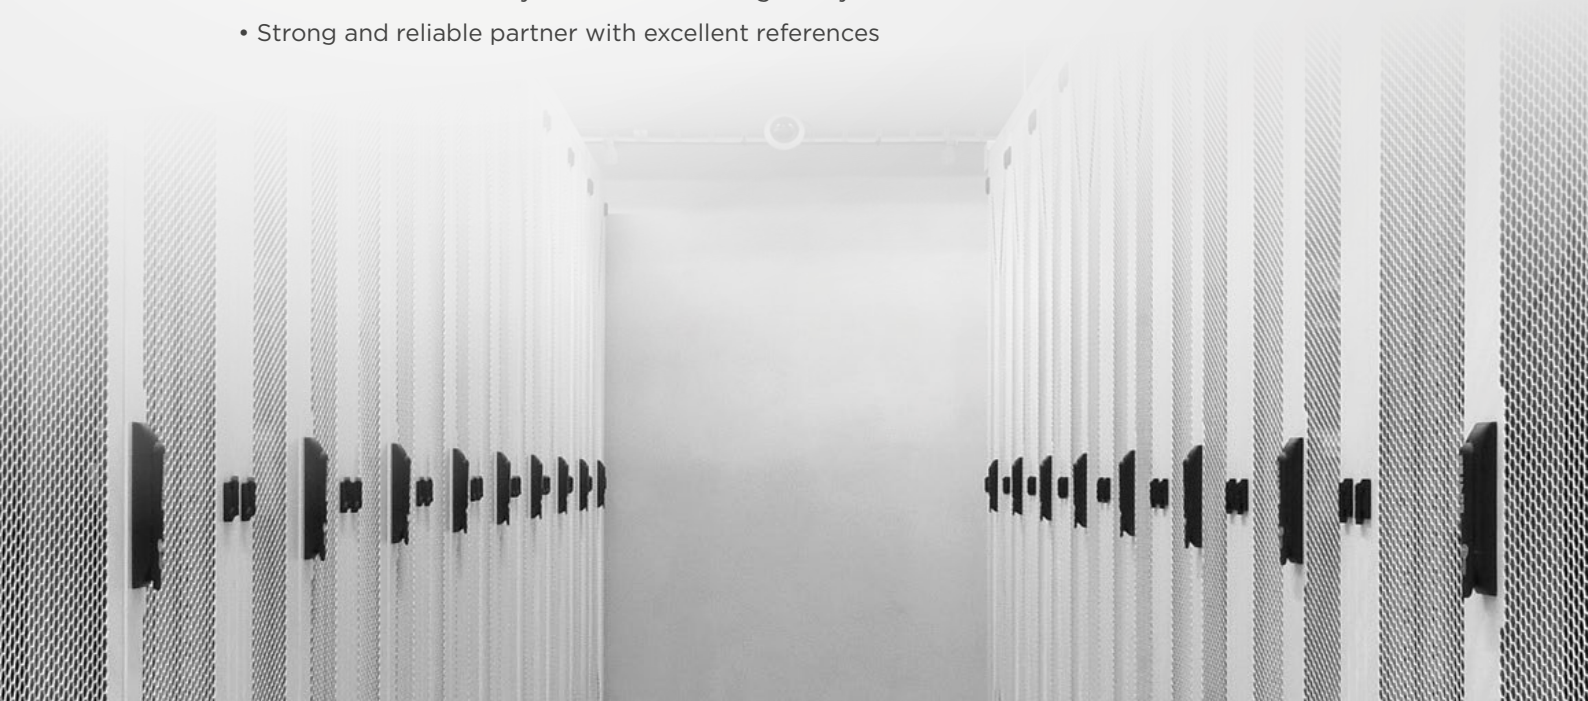

SafeDX provides IT infrastructure outsourcing, data processing and storage services in the Czech Republic and offers hybrid cloud services through its own Tier III data centre situated in the heart of Prague. We focus especially on the markets in the Czech Republic and Central and Eastern Europe. We provide consultancy and assistance in choosing and designing solutions to fit the client's needs while leveraging our advanced infrastructure, professional expertise and experience with the industry and legal environment.

For over 5 years, we have provided services in the Czech Republic using our own data centre's modern infrastructure that meets contemporary demands. We utilise the resources and cutting-edge know-how of our parent company, Foxconn, in IT research, development, manufacture and integration. We co-operate with leading IT manufacturers and suppliers, which gives us access to technological and software innovations that underpin the services we provide to our clients.

## Benefits

- Secure data centre services
- Economical and flexible IT and cloud services
- Private environment and services
- Immediate accessibility in the broader Prague city centre
- Strong and reliable partner with excellent references

# Benefits

## Secure data centre services

- Housing services in a modern TIER III data centre environment
- Dedicated or shared connectivity with minimum latency
- Possibility of direct optical connection to government networks according to required standards
- Biometric identification for access by authorised persons
- Additional layer of security – servers protected in lockable PODs with access control
- Multiple redundancies to secure against power/connection outages and fire
- Complete protection against flooding

## Economical and flexible IT and cloud services

- Minimum IT infrastructure operational costs
- Latest technology without the need for regular capital expenditures for modernization (CAPEX)
- Pay-as-you-go pricing
- Significant reduction of energy costs and a smaller carbon footprint thanks to outsourcing

## Private environment and services

- Discrete environment of a customer-oriented data centre
- Limited number of customers
- Assistance and expert platform services in Czech and English

## Immediate accessibility in the broader Prague city centre

- Local storage of data in a known and accessible location
- Physical proximity to main government institutions
- 20 minutes driving distance from all main office centres in Prague
- 24/7 secure access for authorised persons

## Strong and reliable partner with excellent references

- We understand the needs of market leaders
- We reliably meet above-standard security and procedural requirements based on both organisational and internationally-recognised standards
- We are long-term partners to leading companies in the following sectors: Manufacturing and logistics, IT services, finance and entertainment, banking and retail.
